The Water of Life

Authored by WIBC

Water has a greatness

What do you think about water? Is it just something you drink that is healthy? Is it a substance that is all over the earth that you just except as being part of life?

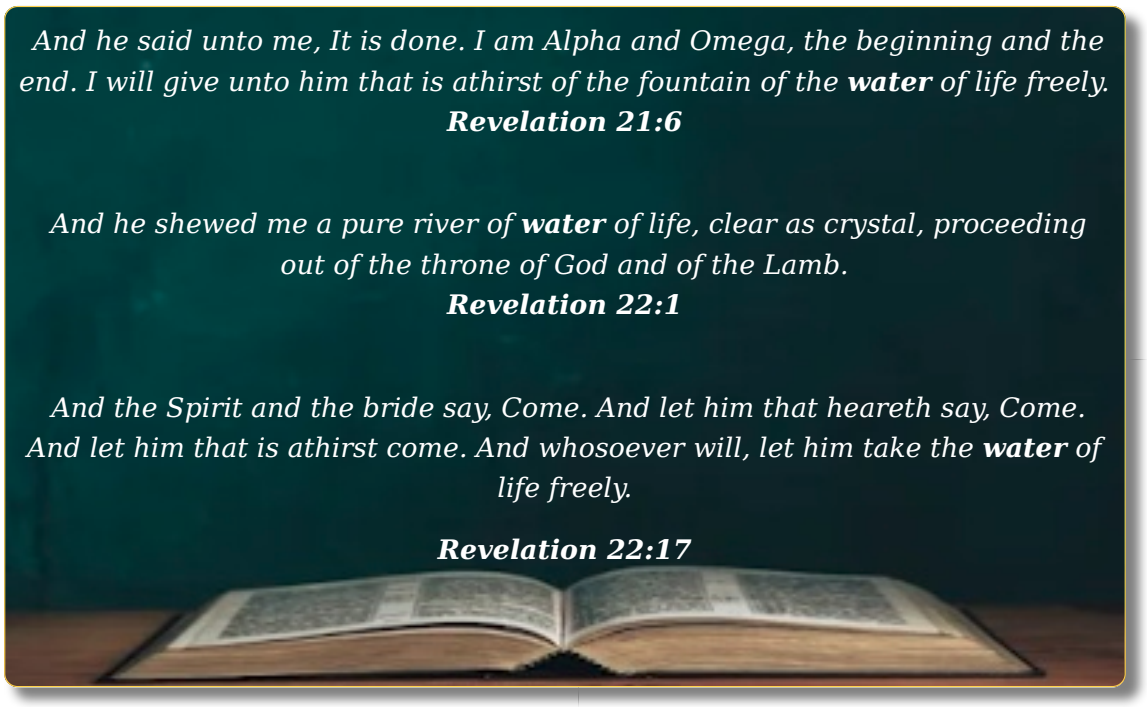
It's all of those and so much more. We can look deep into Scripture and find many verses related to water, but first we will look at just how incredible water is in our life and on the earth.

Did you know your body is 70% water?!!!

Water is the only substance that can have three different states; Liquid, vapour (clouds or gas) and solid (frozen). Water consists of Oxygen and Hydrogen. We breath in Oxygen, and our white blood cells contain 1% of Hydrogen Peroxide, meaning Oxygen and Hydrogen play a key role in our immune system.

If any one of those three states of water was removed; just one, all life on earth; whether human, animal or plant life would die. Without the three existing states of water we lose everything!

Water is a trinity... The Bible reveals that God is one God, but He is also a trinity; God the Father, God the Son (The Lord Jesus Christ) and the Holy Spirit. Because God made mankind in His image, we are also a trinity. Like God, we are one person, but we are each made up of three parts; Body, Soul, and Spirit. And we are about 70-75% water, which is also a trinity. Water is mentioned many times in the Bible, and even has its own numerology.

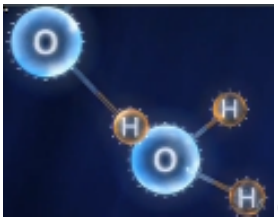


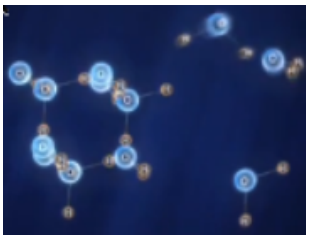
Water also has the most surface tension of ALL liquids on the earth, and is also one of the best solvents. Leave that pan to soak over night and it's easier to clean. Many bugs and insects stand and walk across the surface of water due to high surface tension.

Water's vitality depends on how it flows, or how it is forced to flow, and by what elements play a role in that.

Water reacts to irritations like sound or movement.

(A)



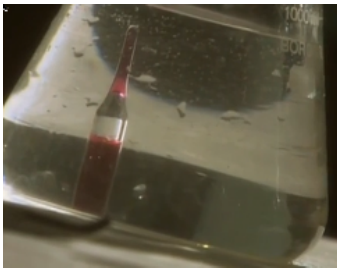
(B)


(C)

Let's touch just a little on the science part. The water molecule is a dipole; one end is charged more positively, and the other end more negatively (pic.A).

The negative end of a water molecule is attracted to the positive end of another water molecule, so that they stick together (pic.B,C). This is how water forms its mass (structure) and these are called clusters.

Water can also be manipulated by other forces around it, such as sound, movement and pressure. Through these molecular attractions water can form inner structures that can be seen under a microscope. Any substance coming into contact with the water leaves a trace in the water. The Egyptians knew about this property of water and they put silver in their water storage and channeling systems knowing it would give the water healing properties. Yes that's correct! Google 'Colloidal Silver Water'.



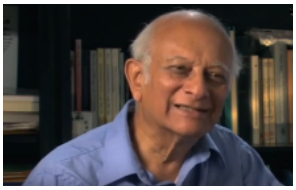
In the 1960s in a closed laboratory in Germany, a lab assistant dropped a sealed glass vile of poison into a open vessel of distilled water. To hide her mistake, she pushed the vessel to the end of the bench and carried on with her work. It sat there for three days but was not raised as an incident because the vial was sealed with no leakage into the vessel of distilled water.

That water was later fed to rats, and they all died shortly after. The water was tested and found to be clean with no contaminants. Somehow the water adopted the properties of the poison. In other words the water received negative information from the vial of poison.

The scientists put together a fantastic hypotheses; namely, that [water has memory]. These findings caused laboratories around the world to perform many experiments on this phenomenon, showing that water kept an imprint of any outside influence remembering everything that occurs in the space around it. And the journey it went on.

Water has memory

After learning how water molecules organize the structure of water, it was seen how water molecules join together in groups, giving the idea that these groups work in some way as a memory, allowing water to record its relationship with the world. It has now been proven that water stores information within its molecular structures.



Roy Rustom, a scientist at the International Academy of Science USA, did vast research on water structure and discovered that water could record information and express (communicate) it back to a receptor (receiver) such as more water, skin or inner body, or within itself under a microscope. This proved that information is stored in water.

The Jelly Fish is 99.9% water

The fact that jellyfish are mostly water led biologists to take a close look at that 1% which is the body. How does that 1% allow the jellyfish to be alive? One of God's great many works in creation no doubt. Vladimir Voeikov a Russian biologist studied the 1% of the jellyfish body and could not conclude how it was alive, and had to just accept that water played a role in the jellyfish being a life form. He also found that humans embryos begin as 95% water, but are already alive from the first stage as a living embryo.

Prof Martin Caplin of London University UK, said "I think scientists should look more closely at how water interacts with its molecules."

On a molecular level water creates the structure of DNA. Without water, the DNA Helix would fail to form, as water creates its structure of proteins. Our bodies would therefore not form in the womb without water.

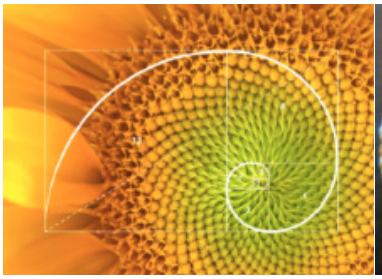
Water literally has its own life cycle through the sea, rivers and clouds in the sky. To human beings, water tastes the same, looks the same and behaves the same, but knowing all we have just learnt, it is impossible to find identical water on earth.

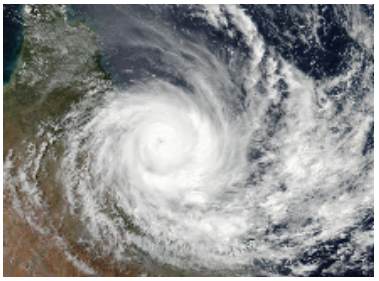
If you lose 2% of your body's water, your body expresses thirst
giving you the need to drink.
If you lose just 12% of your body's water,
you die.

Dead Water: Sound and Vibration

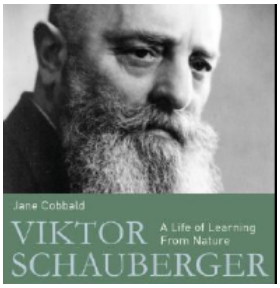
This is already a big article, and we have not touched on the word "water" in the Bible yet, but we will do so after covering this last concept of water, 'dead water'. What is dead water? It is water that has been on such a bad journey, and recorded all the bad attributes and energy of that journey, that it has become full of negative construct to the point it has very little benefit, when compared with healthy and vitalized water.

Man's systems for cleaning, pumping and channeling water is based on the idea that 'Water is a fluid without life or energy' so we don't care how it's treated, or the experiences it's put through. Thus, water is pushed through many pipes and chambers, and flows through long straight channels, and various tanks and containers with shapes and forms not found in creation. And so water is controlled by man in a way that is contrary to its natural path as we find manifested in creation.





Spiral forms are found throughout the earth; seen in flowers, sea shells, sea waves and weather systems, to name but a few. If you pay attention to God's creation around you, you'll see they are much more plentiful than you may have imagined. They represent a law of constant change in a natural flow. If we want water to remain alive we must give it the opportunity to breath and collect good positive energy gained from exposure to God's natural surroundings.

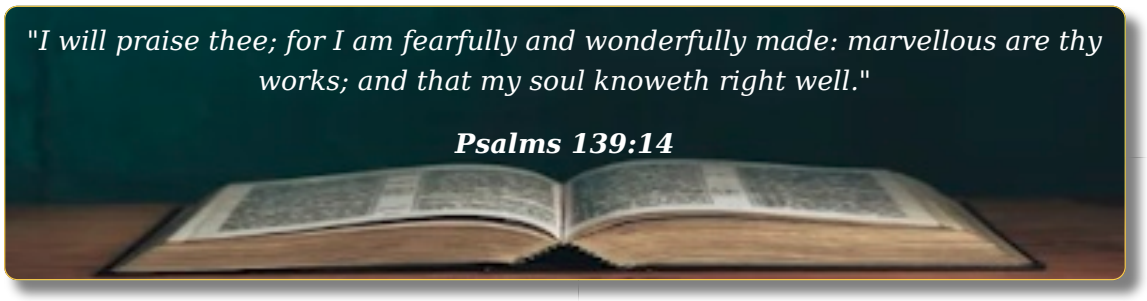


Viktor Schouberger invented the vortex fountain that changed the properties of water, by causing molecular manipulation of the water in order to revitalise it. The fountain would cause the water to split into two vortexes spinning in opposite directions to each other, which caused the water to pulsate rhythmically. This simulated water flowing down a mountain stream, where it would hit rocks, spin and collect all it needed to revitalise.

Now we end on a big note just before we go into the Word of God and how this is ALL found in the King James 1611 Bible; the Authorized Version of Scripture.

Viktor's fountain manipulation of the water mimics the way your heart pumps your blood. Your

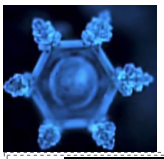
heart spins the blood in a vortex in each chamber. God made your heart to re-energise your blood before and after it has collected oxygen from the lungs. Remember you are 70% water, and your blood is mostly water. The heart also has its own magnetic field, which has a positive cleansing effect on the water in the blood.



Water reacts to sound and emotions

Maseru Emoto is a well known Japanese scientist that studied the molecular and crystal structures from water, using sound waves, frequencies and vibration. And he discovered that water had incredible properties!

Mr Emoto studied the properties of water for 15 years and discovered it has a memory, and reacts to its surroundings positively or negatively. He exposed water samples to many different types of stimulation. He then froze it to -5 Celsius, and examined the crystals in the water under microscopes. He saw that water responds to frequency and resonance. The shapes of the patterns of the water also revealed that water responds to moods, music, words and emotions. Non-vitalised water produced less crystal shapes, with a low sensitivity to surroundings, but vitalised water was much higher.



Each positive healthy crystal expands out from six corners of its hexagonal base, if the water is vitalised.

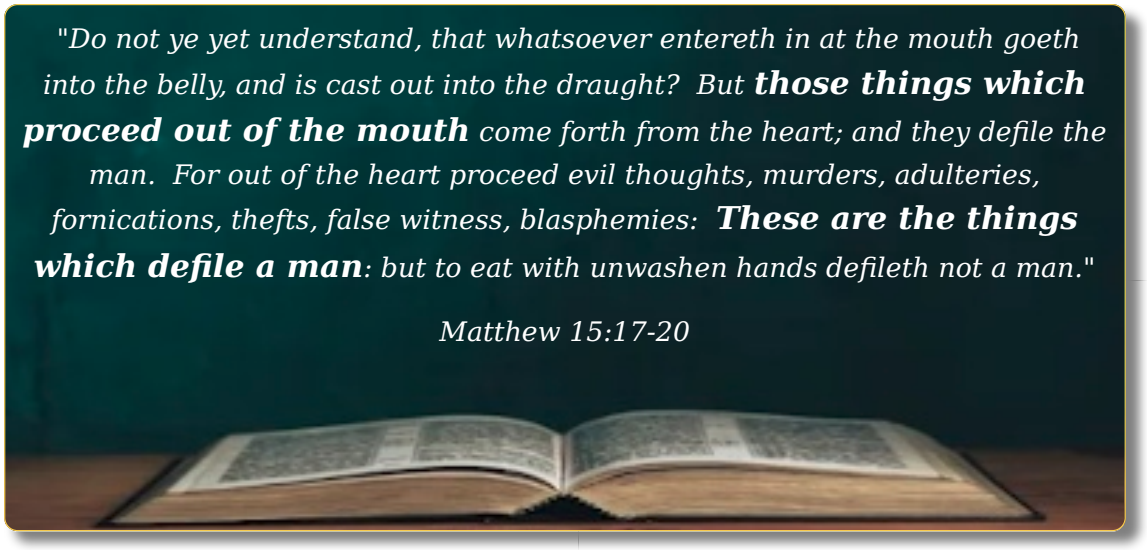
What influences frequency and resonance?
Sound, Radio waves, Emotions, the Heart's Magnetic Field, and physical Vibrations such as the beating of a drum.

The Words you speak, and the music you listen to are affecting the 70% of water inside YOU! Your throat's voice box vibrates (resonates) when you talk or sing. Did Jesus have some words on this? Yes, he did:



We have a strong article on the smallest yet deadliest member of the body namely your tongue, entitled: Mind your mouth. In the Bible its clear that our words defile us, not just in the spiritual sense but within our body also. If you spend your life speaking evil or bad words, or listening to other sounds of the same, YOU WILL BECOME LESSER than you should be, including spiritually.

Satan was in charge of worship and music in heaven. That's why today's music is full of rough hard unrighteous words about sex, fighting & drugs etc. Satan knows this will effect people in a negative way that they will not be aware of.

And now let's look a little into the numerology.

(Excluding "Waters") **"Water"** is mentioned 396 times in the Bible, in 45 Books, so it must be important to God and His Word.

(Excluding "Hearts") '**Heart**' is mentioned 830 times in 54 books of the Bible.

They are both closely related to each other in the Word. Jesus is the water of life. Now lets take this a little further into more numerology.

'Water' has 396 mentions in 45 books: 396 + 45 = 441

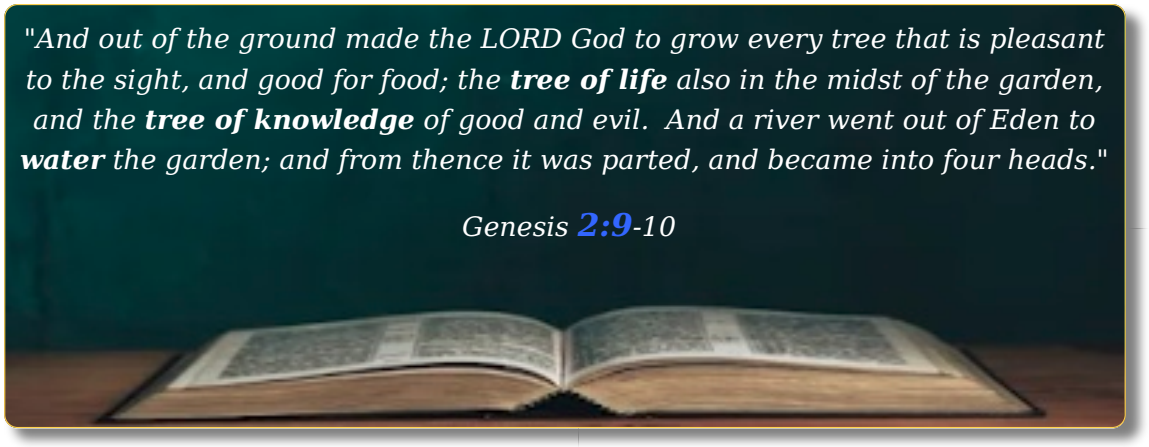
'Heart' has 830 mentions in 54 books: 830 + 54 = 884

441 + 884 = **1325**

There are **31,102** verses in the KJ-Bible. **-1325 = 29,777**

Genesis **2:9** is the verse before the **first** mention of '**Water**' in chapter 2.

God Purified his Word **7** times. See (Psalms 12:6)



Water has **life** and has an ability to **remember** (**knowledge**). Without just one of the three states of water all living things will die. Water is a Trinity.

Now let's, look at the plurals in the numerology. All searches were combined upper/lower case on all accounts, using the Pure Bible search tool. Its a very tried and tested accurate search aid.

"waters" is mentioned **287** times in **33** books.
"hearts" is mentioned **112** times in **39** books.

287 + 33 AND 112 + 39 = 471

There is only one verse in the bible
with these numbers, mentioning 'Waters'.

Ezekiel 47:1

The Bible encourages us to count the word, and sometimes the numbers lead you into a whole study subject. Here's a quick extract from the course 'Bible Numerology' to give an example. Numerology shows how God verified and authenticated, and purified his Word.

We should count the Word

Exodus 12:4

*And if the household be too little for the lamb, let him and his neighbour next unto his house take it according to the number of the souls; every man according to his eating shall make your **count** for the **lamb**.*

Count = 26 mentions in KJ Bible
'The Lamb' = 26 mentions in KJ Bible all directly referring to Jesus Christ

www.wibc.academy

Isn't that just amazing! You can follow Bible numerology on TruthIsChrist by Brendan Peterson, or take a study course here with tutor guidance and support.

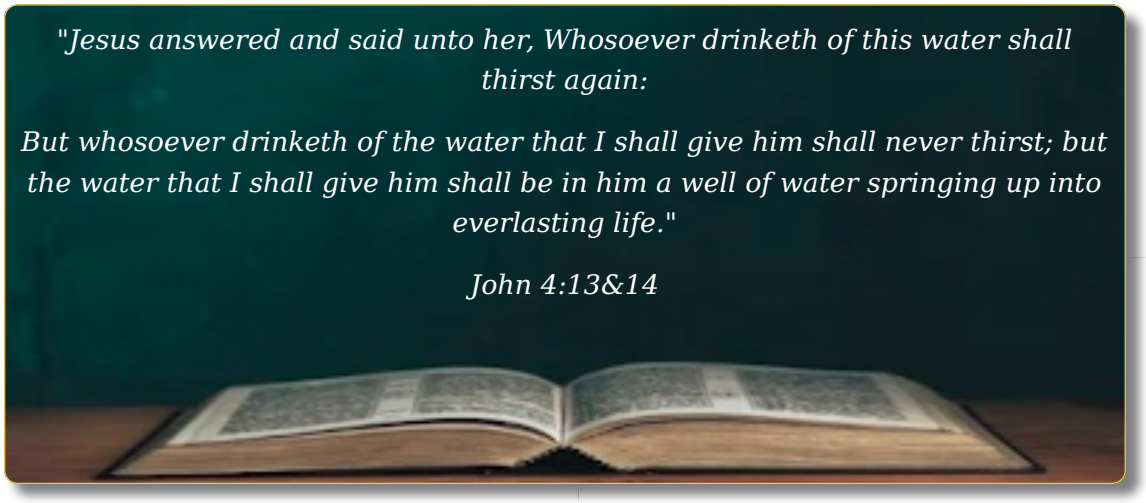
Now lets follow our pointer to Ezekiel 47:1. This points us to the first verse of chapter 47.

So lets study that chapter where the numbers point to, keeping water and the heart in mind.

Reminder: You can download this article as a pdf book for free in the shop. There are no copyrights. The Word of God is a free gift, and you may use it as you wish to spread the Word.

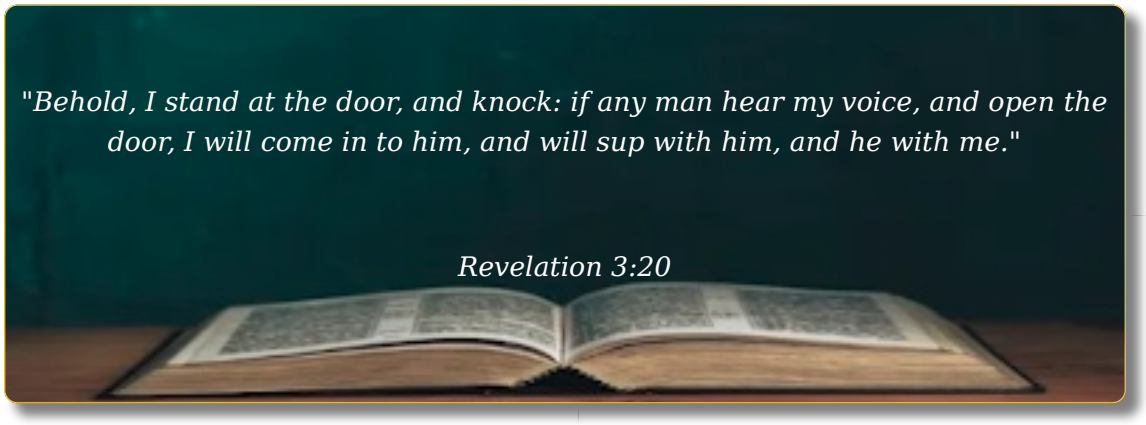
Ezekiel 47:1 Full text (loads around 35-45 secs load time in a modal window on slower internet)

This takes us straight to the end of Ezekiel's vision where there is to be a **river** flowing, bringing life and healing to the land. What are the chances of that? Very slim I think. This river is symbolic of spiritual renewal and rebirth. Jesus is the **Water** of life.

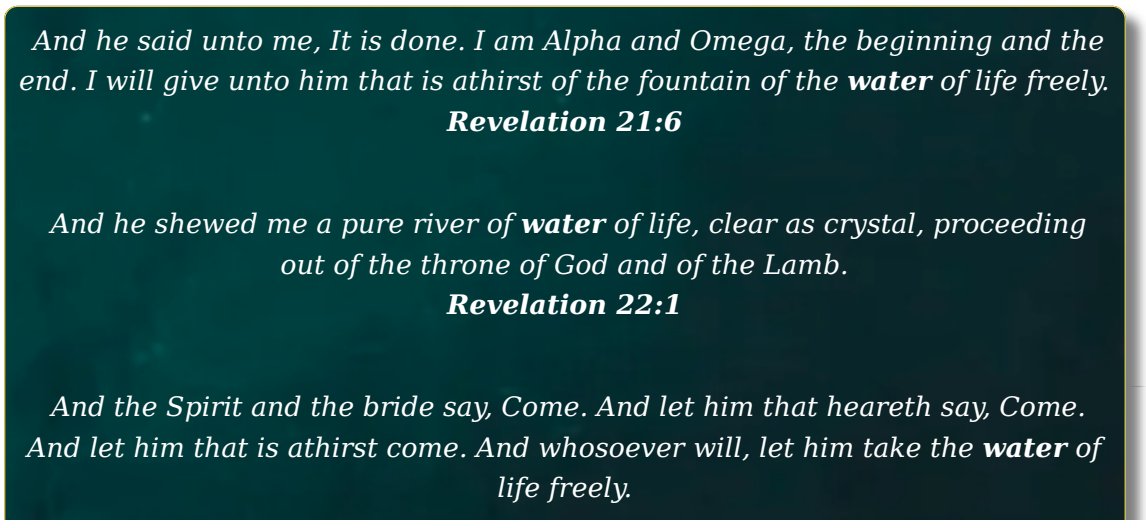


Finally

Jesus Christ who is the **water** of life stands at the door of your heart, asking to be let in:



It is up to us to open the door of our hearts to the Lord Jesus Christ. And to those who do, He gives eternal life; "A well of water springing up into everlasting life" (John 4:14).



All glory to God the Father and our Lord & Saviour Jesus Christ.
